Description

With the current git version (commit e1781235696fe23851154ebbdc913e970d3c0f3a), it is not possible to create a new issue and change the "Tracker" setting from "Bug" to "Feature". Upon changing this setting to "Feature", following error appears:

```

It looks like the controller wants to refer to an issue ID while there is currently no issue ID for this issue (as this is a new issue in progress to be created).
