

Redmine - Feature #4374

Issues - Description preview on hover

2009-12-10 10:00 - alten benelux

Resolution:			
Description			
<p>It would be very handy to be able to preview the description of an issue without having to actually open it. I was thinking of something like the 'white popups' on the planning-calendar.</p> <p>The details are subject to discussion :</p> <ul style="list-style-type: none">• a new available column with a preview button/icon or something (that would show on 'roll-over')• or this same behavior but on the title (with a setting to activate it ?) <p>Could be on the 'My Page' too. Could be more than just the description, although the other fields are already available...</p>			

History

I'm willing to help on this. I have only little knowledge on ruby on rails, but it'll keep me busy during the holidays! :p
How should I proceed ?

1. Wait for your validation / comments
2. Get the sources from gits, code until I get something working well.
3. Submit a patch ? (not a plugin for this I suppose...)
4. Adapt following your feedback
5. Wait for it to be released :)

Would that be a normal course of action ?

#2 - 2009-12-10 12:52 - Andrew Chaika

See: <http://www.redmine.org/boards/1/topics/4402#message-8291>

Demo: <http://shaneandpeter-design.herokuapp.com/projects/mosciski/issues>

Code: http://github.com/edavis10/redmine_shane_and_peter_design (not working with current redmine)

#3 - 2009-12-10 13:14 - alten benelux

Ok, their tooltip looks nice indeed.

What do you suggest I do ? Wait for them to release it to redmine core or try to make a patch based on this theme ?

#4 - 2009-12-10 14:16 - Kamil .

Patch would be more straightforward I think...

This branch should work with a stock trunk Redmine. We will be testing and releasing once 0.9 final is out.
