Description				
Add users to a group & assign projects to a group so users can not see the other projects that do not belong to them				

History

#1 - 2007-10-03 15:18 - Jean-Philippe Lang

        so users can not see the other projects that do not belong

to them

No need for group. Just declare a project as private, then only
members of the project will see it.

#2 - 2009-01-07 14:50 - Pim Snel

Still It would make it far more easier to create and configure projects when working with large teams if you could assign a project to a group in stead
of individual members
