

## Redmine - Feature #4462

### Per Project Emission Address

2009-12-21 16:03 - Bellatoris Opacus

<b>Status:</b>	New	<b>Start date:</b>	2009-12-21

<b>Category:</b>	Email notifications	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Resolution:</b>			
<b>Description</b> It would be wonderful to be able to set an emission address per project, rather than having the universal emissions address. For example:  Project A: "From" set to " <a href="mailto:projecta@domain1.com">projecta@domain1.com</a> " Project B: "From" set to " <a href="mailto:projectb@domain1.com">projectb@domain1.com</a> " Project C: "From" set to " <a href="mailto:projectc@domain2.com">projectc@domain2.com</a> "  More here: <a href="http://www.redmine.org/boards/2/topics/9931">http://www.redmine.org/boards/2/topics/9931</a>

### History

#### #1 - 2010-12-16 12:48 - Dan Scharon

Indeed, this is actually a must have.

#### #2 - 2011-01-12 19:02 - Rene H

Please add this feature. This is really a trivial feature for an setup with multiple projects!

#### #3 - 2011-01-17 14:32 - Andrey Gazizov

Hi!

until such feature has not implemented in redmine, I modified the mailer.rb file (/usr/local/www/redmine/app/models/) like this:

```
[...]
def issue_add(issue)
  redmine_headers 'Project' => issue.project.identifier,
  'Issue-Id' => issue.id,
  'Issue-Author' => issue.author.login
  redmine_headers 'Issue-Assignee' => issue.assigned_to.login if issue.assigned_to
  message_id issue
  from "\"#{issue.author}\"" <#{issue.author.mail}>
  if issue.project.identifier == "bug"
    recipients ["projecta@domain1.com"] # <- issue.recipients
    cc(issue.watcher_recipients - @recipients)
  else recipients ["projectb@domain2.com"] end
[...]
```

Hope this temporary solution will be helpful to somebody ;-)

+1 Definitely an important requirement.

#### #5 - 2011-04-20 10:17 - Frank Brenner

+1 We need this before we can migrate from Trac.

**#9 - 2019-02-11 03:44 - Go MAEDA**

- Has duplicate Feature #11894: Configurable emission email address added

**#10 - 2020-01-31 19:37 - Jenda Benda**

+1 this would help really as we provide each of our customers with dedicated email address where we capture tickets sent to it...these are converted into the issues in specific project (per customer).

When any update is done to the issue, email is sent from primary/main email address configured for redmine, which is confusing. Any reply then causes mismatch...

thanks so much for considering this.

j.
