

Redmine - Defect #4464

Related issue doesn't belong to the same project

2009-12-21 17:17 - pasquale [:dedalus]

Status:	Closed	Start date:	2009-12-21
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	0.8.7
Resolution:	Duplicate		
Description I can't make related a bug that is from a project (A) to another project (B): redmine alert me with "« Related issue » doesn't belong to the same project" message. But this isn't real because if I create a root project and some child project, I can't refer to a change in project root that requires change also in subproject. For example: <ul style="list-style-type: none">• project root is a presentation layer;• project child (subproject) is a data abstraction layer;• another project child (subproject) is some *.dll helper; I think that as in other tool as bugzilla from any ticket I should be able to refer to another ticket, without cloase that both are related to same project.			
Related issues: Is duplicate of Redmine - Feature #3805: Issue references between issues in o... <div>New2009-09-02</div>
