

Redmine - Defect #4497

Wrong info about API key when generated on-the-fly

2009-12-28 13:51 - Felix Schäfer

Status:	Closed	Start date:	2009-12-28
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:	UI	Estimated time:	0.00 hour
Target version:	0.9.0	Affected version:	
Resolution:	Fixed		
Description			
<p>I just updated one installation to current trunk, and the /my/account page displays "Missing an API access key" although it gets generated and shown if one clicks on the "show" Link. Reloading the page fixes this. I suppose the user-object passed to the view to make the decision to display "Missing an API access key" or something else is stale and doesn't yet have the info that there in fact is an API key.</p>

- Target version set to 0.9.0
- % Done changed from 0 to 100
- Resolution set to Fixed

Thanks for the bug report, this is fixed in r3265 (r3266 in 0.9-stable). You were correct about a stale object, the API key was being generated on the fly but the user on the view didn't see any key.
