

Redmine - Defect #45

Wiki names can't have periods in them

2007-04-18 14:16 - Damien McKenna

Target version:		Affected version:	
Resolution:			
Description <p>Related to the other bug on project names, I set the project's wiki start page to be "www.mysite.com". When I clicked on the Wiki link in that project's menu it showed that the page name had been changed to "Www.mysite.com" (notice the first letter being upper-case). Then when I tried to save the page it gave an error message saying that the page could not be found. As soon as I changed the project's wiki start page to "WwwMysiteCom" it all magically worked again.</p> <p>Please either make the wiki start page field not allow periods or make the wiki system allow them, right now one is allowing them while the other is not.</p> <p>Thanks again.</p> <p>Damien</p>

Fix committed.
Periods are no longer allowed in wiki start page name.

Thanks.
