

Redmine - Defect #4513

MessageObserver: wrong use of compact.uniq??

2010-01-02 12:09 - Anh Kỳ Huỳnh

Status:	Closed	Start date:	2010-01-02
Priority:	Normal	Due date:

Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	No feedback		
Description			
In the class MessageObserver, there is a line to compact the list of recipients			
<pre>recipients = recipients.compact.uniq</pre>			
The purpose of this line is to make recipients array contains each item once. But I found I still have duplicate items in message_posted (class Mailer). I don't know why so I have to change it:			
<pre>parsed = Array.new recipients = recipients.select do m next if parsed.include?(m.user.id) send_mail = check_if_user_want_to_receive_mail(m) parsed << m.user.id send_mail end.collect{ m m.user.mail}</pre>			
and then I don't have any duplicated items anymore in recipients . I amnot sure but I think this problem is due to Rails/Ruby.			
Hope this helps.
