<b>Target version:</b>			
<b>Resolution:</b>			

#### Description

It seems that there is some logic defect in how permissions work in case if user wants to save query which is applicable on global level (ie for all projects) and make it public

Right now only user with admin rights can manage those queries (ie make them public and edit them)

I think it makes sense to add permission so users will be able to manage global public queries.

I am using [r3280](#) with Ruby 1.8.7 and Rails 2.3.5

#### History

##### #1 - 2010-01-05 19:09 - Jean-Philippe Lang

- Subject changed from *Only user with admin rights can create and edit public queries for all projects* to *Permission for non-admin users to manage cross-project public queries*

##### #2 - 2010-01-05 19:09 - Jean-Philippe Lang

- Tracker changed from *Defect* to *Feature*

##### #3 - 2010-07-09 20:55 - Felix Schäfer

Were you thinking about removing the lock on public queries for all projects for users with the "manage public queries" permission, or about a new permission?
