Description

dear Sirs:

i am compiling kannel "gateway-1.4.3" ,
every thing is OK with ./configure like bellow:
sh ./configure –prefix=/usr/kannelnew –with-mysql –with-mysql-dir=/usr/include/mysql
but "sudo make" gives an error at the end of compiling:
……………………….
/bin/bash: ./utils/foobar-config.sh : permission denied
make: *** [gw-config] Error 126
……………………….
i dont know why this error occurs, i install all kannel Requirements.

note : my OS is ubuntu server 9.10!!
what i miss here??
i also want to install sqlbox over kannel with mysql DB engine after compiling it correctly, is it possible to do that??
plz help
thnx
sando
