Target version:				
Resolution:	Wont fix		**Affected version:**	

Description

ActionView::TemplateError (undefined method `<=>' for nil:NilClass) on line [#3](#) of app/views/project...

app/models/member.rb:53:in `<=>'
app/views/projects/settings/_members.rhtml:3:in `sort'

giving up of the 'sort' , runs without any problem...

<%   members = @project.member_principals.find(:all, :include => [:roles, :principal]) %>

as I mixed up some records in my DB after an upgrade, is it an error coming from bad records in DB or from some requirements ...

History

#1 - 2010-01-17 11:05 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Wont fix

This error is raised because you have a Member without a valid Roles or Principal association in the database. Fixing #<=> is not the solution, you have to fix your data.

#2 - 2010-01-17 12:15 - Jean-Philippe Lang

You can use this to find your invalid entries in the members table:

```
Member.find(:all, :include => [:roles, :principal]).select {|m| m.roles.empty? || m.principal.nil?}
```
