

## Redmine - Defect #4576

### Japanese Character pattern matching

2010-01-14 01:50 - Jeffrey Jones

<b>Resolution:</b>	Invalid		
<b>Description</b>			
<p>It should be noted that I am receiving emails using pop and the patch in Issue <a href="#">#2420</a> but I don't think the problem lies with this.</p> <p>When I try and send emails to the redmine server with Japanese characters in them it appears to work apart from the pattern matching.</p> <p>For example if I send an email with the following keywords.</p> <p>Project: happi Tracker: []</p> <p>The email is processed but it isn't assigned to the correct tracker and "Tracker: " appears in the issue body. However it does get assigned to the correct project. I am assuming that the pattern matching cannot handle the UTF-8 encoded Japanese (or all multi-byte?) characters.</p>			

#### Associated revisions

##### Revision 3322 - 2010-01-17 12:00 - Jean-Philippe Lang

Adds a test with Japanese keywords in a ISO-2002-JP encoded email (#4576).

#### History

##### #1 - 2010-01-14 12:45 - Anton Statutov

The same problem exists with russian names

##### #2 - 2010-01-14 13:01 - Anton Statutov

Possibly [#2059](#) is related issue. It was already fixed, so maybe try 0.9 RC?

##### #3 - 2010-01-16 11:54 - Jean-Philippe Lang

No, this is not the same as [#2059](#).

##### #4 - 2010-01-16 11:55 - Jean-Philippe Lang

Can anybody attach a raw email that contains such keywords so I can include it in tests? Thanks.

##### #5 - 2010-01-17 11:45 - Jean-Philippe Lang

- File *japanese\_keywords\_matching.eml* added

I've just tested with the following email and it does work.

##### #6 - 2010-01-18 01:21 - Jeffrey Jones

- Status changed from *New* to *Resolved*

My apologies, I didn't have the overrides setup correctly on the rake task.

I can confirm this is working correctly. PEBKAC

##### #7 - 2010-01-18 18:55 - Jean-Philippe Lang

- Status changed from *Resolved* to *Closed*

- Resolution set to Invalid

OK, thanks :-)
