Description
Currently in 0.8.7 text in comments for logged time records and sub-text (The italic text) for activity log records are not parsed for things like commit:c36c924b10be588e81f060c3b9d7b8711445dc45 and [#45](#45) Having this happen would be very useful and bring these fields in-line with the majority of RedMine.

I'm not sure they should textilized as they should be short messages (so limited scope), but I'll try to discuss it on one of the next dev meetings.
