Redmine - Defect #4648

Using repository comments to change issue status conflicts with workflow

2010-01-25 14:24 - Sebastian Cabot

Status:	New	**Start date:**	2010-01-25
Priority:	Normal	**Due date:**	
Assignee:		**% Done:**	0%
Category:	SCM	**Estimated time:**	0.00 hour
Target version:			
Resolution:		**Affected version:**	

Description

Consider the following status workflow options:
The Bug Tracker has both Resolved and Closed.
The Feature Tracker has only Closed.

If I configure the repository setting to use the fixes keyword to change the status to Resolved.
If I commit a change that says fixes #30 and #30 is a feature I will not be able to modify the status for that issue anymore (unless I change the workflow).

In my opinion it should be fixed to either allow different repository options per tracker (BEST)
Or to allow a status change hierarchy say first resolved than closed than x etc.
Or to allow specific status change from the comment (something like set #30 closed) - Maybe this should be implemented anyways
Or not to change the status to a status that is not in the workflow.
