

Redmine - Feature #4651

Display a link to the newly created issue in the flash message

2010-01-25 14:48 - Holger Just

Target version:	
Resolution: Duplicate	
Description Often times I create multiple tickets in a row and reference them in multiple places (like an additional issue, an email to the customer, an IM message, ...) Therefore I think it is desirable to know at least the id of the newly created issue directly after its creation. The attached patch extends the "successfully created" flash with a link to the newly created issue which contains all needed info.
