Redmine - Patch #4661

In roadmap.rhtml, misplaced minus-signs.

Description

Well, kinda small patch but this thing has been irritating me for some time.
It looks like this does not affect redmine, but it is always found as an error in Aptana Studio.
Please correct me if I'm wrong about this.

- Status changed from New to Closed

<%- ... -%> is actually valid ERB, it means to trim leading whitespace '<%-' and trailing whitespace '-%>'. This sounds like a bug in Aptana Studio's parser.
