Redmine - Feature #467

Allow Custom Fields in Project Summary

Description

Currently the project summary fields are statically limited to "Creation date" or "Tracker"
or "#." In the administrative options that allow fields to be created, could these fields also be flagged
to be displayed on the summary window?

For that matter, cold existing fields be UNflagged?

History

Hi,
I don't know which version of Redmine you're using, but project
custom fields are displayed on the project overview just below
the creation date (unless the field was left empty).

#2 - 2007-11-05 16:14 - Robert Hallock

Maybe I mis-spoke myself:

When I look at the complete list of all my open issues in
the project, I cannot see the custom fields I have added as
individual columns.

Is this possible? Is there a setting I need to change?

#3 - 2007-11-05 17:17 - Jean-Philippe Lang

Is it the same as this one ?
http://rubyforge.org/tracker/index.php?func=detail&aid=12939x%x%
amp;group_id=1850&atid=7163

#4 - 2007-11-05 17:20 - Robert Hallock

Yes! I suppose so. Shame on me for not searching more
thoroughly.

Being able to add/remove columns (Including custom ones) to
the issue list would be fantastic. Thanks for your time, JP.

Sorry to bother.

Hi,

FYI, it's done in r889.

Custom fields can now be displayed as columns on the issue list.
Custom fields marked as "for all projects" can
be added
to the default columns of the issue list (in application
settings).
Project specific custom fields can be displayed on custom
queries.
