Redmine - Feature #4730

Add Closed Date to Issue Filter

2010-02-03 18:03 - Mark P

Status:	Closed		**Start date:**	2010-02-03
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Issues		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Fixed			

Description

I can query/filter issues by created, updated, and due dates. However, I cannot query by when the issue was actually closed. I know this information appears to be stored in journals and journal_details rather than issues table, which may make this a tad more complex. I have tried to write custom SQL for this myself, but I am not getting results that match the information on the History section of an issue.

- Category set to Issues

- Status changed from New to Closed

- Resolution set to Fixed

"Closed" (closed_on) field that stores the time of the last closing, while preserving the value when reopening an issue, is added in r11402. It has been made available as a column and filter on the issue list in r11403. Both were done on #824 which will be part of Redmine 2.3.0.

This means that the feature requested in this specific issue is implemented, hence closing this issue as such.
