Any idea where this problem comes from?

Have you made all the [upgrading](#) steps correctly?
Especially, "Step 4 - Update the database":

```
rake db:migrate RAILS_ENV=production
```

In my opinion, this is related to the subprojects nesting representation in the DB.

#4 - 2010-02-04 16:32 - Anonymous

Yes.

```
root@ruby:/opt/redmine/redmine-0.9.1# rake db:migrate RAILS_ENV=production  
(in /opt/redmine/redmine-0.9.1)  
root@ruby:/opt/redmine/redmine-0.9.1#
```

#5 - 2010-02-04 19:56 - Jean-Philippe Lang

Please try to run:

```
ruby script/runner -e production 'Project.rebuild!'
```

Sorry but I have to reopen this ticket. I did what you asked and that didn't work.

I did the following:

```
root@ruby:/opt/redmine/redmine-0.9.1# mongrel_rails stop  
Sending TERM to Mongrel at PID 32673...Done.  
root@ruby:/opt/redmine/redmine-0.9.1# ruby script/runner -e production 'Project.rebuild!'  
root@ruby:/opt/redmine/redmine-0.9.1# mongrel_rails start -d -e production -p 3000
```

Some pages are working. Some are not. Mostly pages with an overview of the projects.

I get the following error:

```
