Redmine - Defect #4754

Redmine is crashing when we group on a custom field

2010-02-08 01:34 - Ewan Makepeace

Status:	Closed		**Start date:**	2010-02-08
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	0.9.0

Description

1. We have a custom field 'Sprint'
2. It is shown as available for grouping in the issues list.
3. However if we do that Redmine crashes and has to be restarted.

Original report from my developer:

I have found a bug of the latest version of Redmine.
I think in orginal redmine, there is no column for Sprint.
Sprint is our "custom column" or it called "custom_fields ", am I right?
so when I group by Sprint, and it shows:

```
Internal error

    An error occurred on the page you were trying to access.
        If you continue to experience problems please contact your redMine administrator fo
r assistance.
```

it seems group by can NOT apply to custom_fields. and it will cause error.

History
