| Resolution: | | | |
| <div>Description</div> <p>I am pretty sure I saw a note somewhere that this had been fixed once. Now if an admin tries to raise an issue in a project not assigned to the following error is displayed.</p> <p>You have a nil object when you didn't expect it! You might have expected an instance of Array. The error occurred while evaluating nil.sort</p> <pre>#{RAILS_ROOT}/app/models/issue_status.rb:51:in `find_new_statuses_allowed_to' #{RAILS_ROOT}/app/controllers/projects_controller.rb:219:in `add_issue' -e:3:in `load' -e:3</pre> <p>I believe this is caused by the recent workflow changes.</p> | | | |

You're right. Fixed.
Thanks

#2 - 2007-04-24 11:21 - Jean-Philippe Lang

Oops, it was not really fixed. Now it should be.
