Redmine - Patch #4800

Ability to add search providers from plugins

2010-02-11 09:19 - Andrew Chaika

Description
When I was trying to upgrade Redmine Blogs plugin to 0.9.x Redmine and to implement an activity and a search providers I have found that the search engine (*acts_as_searcheable*, *search_controller*) in Redmine has hard-coded list of search providers/types without ability to add a new providers/types.   Thus I found that the activity/event/search subsystems are project dependent. In activity/event I have found workaround, but in search don't.   I have patched *acts_as_searchable.rb* and *search_controller.rb* to solve described problem.   Eric,   Could you review the patch and if it's OK apply it to the core?

History

#1 - 2010-02-12 21:03 - Andrew Chaika

There is a similar issue #3936.

#2 - 2010-02-17 16:04 - Andrew Chaika

- Assignee changed from Eric Davis to Jean-Philippe Lang

Jean-Philippe, or anyone from the core developers team, could you review this patch and say what additionally I must do to bring such functionality to the Redmine code?

#3 - 2010-02-17 20:25 - Jean-Philippe Lang

It breaks a test:

```
  1) Failure:
test_search_for_projects(SearchControllerTest) [/test/functional/search_controller_test.rb:28]:
<false> is not true.
```

I'll have a deeper look asap.

Another point about your patch, searchable types order depends on models loading order.
The search form is kind of messed up.

#5 - 2010-12-21 05:58 - Mischa The Evil

- Status changed from New to Closed

- Assignee deleted (Jean-Philippe Lang)

Closed the issue as being implemented by issue #3936.
