Redmine - Defect #4817

All-project (system) shared versions not filtered properly

2010-02-12 10:52 - Anonymous

Status:	Closed	**Start date:**	2010-02-12
Priority:	Normal	**Due date:**	
Assignee:		**% Done:**	0%
Category:	Roadmap	**Estimated time:**	0.00 hour
Target version:			
Resolution:	Invalid	**Affected version:**	0.9.2

Description

All project system versions should be treated differently than hierarchy-tied versions.

1. System versions should not change project when clicking on version in task list. When I click on task tied to system version, I am transfered away to another project - project where this "system" version was created.
2. When listing RoadMap for projectA, I see tasks from (completely unrelated) projectC, projectB, projectD that are tied to "system" shared version. Thats a bug.

In general - I think that system versions should not keep / expose the project, where they were created - since that is irrelevant most of the time.

History

#1 - 2010-02-12 19:23 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Invalid

These so called "system versions" are project versions that are shared with other projects. They still belongs to a project.
Maybe that's not what you want but i can't accept this as a defect. Maybe a feature request.
