Description Hi, It would be nice to have a java implementation of the redmine API, this could possibly just be done using the mobile java implementation raised as a different feature request.	
Related issues: Is duplicate of Redmine - Feature #4831: mobile java implementation of redmin... Closed 2010-02-13	

History

- Category set to REST API

#2 - 2010-04-20 23:50 - Alex Last

I'm looking for Java API to parse Redmine REST API XML data. Will have to create a new API if it does not exist yet.

#3 - 2010-04-22 01:42 - Alex Last

Eclipse mylin-redmine connector should have the Java API to parse Redmine data. here's the link:

<https://sourceforge.net/projects/redmin-mylyncon/develop>

I asked them to provide that API in reusable form, but not sure if anyone is still working on that project.

#4 - 2010-04-24 06:50 - Alex Last

I created a draft version of Redmine Java API.

Sample Java Application to parse Redmine data and generate Microsoft Project file (includes Redmine Java API):

http://redmine-connect.googlecode.com/files/redmine_connect.zip

I will keep working on that project.

#5 - 2010-11-29 21:50 - Alex Last

the zip file attached above is outdated now. I have Java API for Redmine REST service, which I'm using in this project:

<http://code.google.com/p/redmine-connect>. I'm going to cleanup/refactor the API and then maybe provide it for a separate download.

#6 - 2010-12-26 00:47 - Anonymous

Unfortunately I always get an 403-Error when trying to access this page ;-(

#7 - 2010-12-26 01:42 - Alex Last

Hello, Markus. The project has moved to another website. Unfortunately, I can't delete the old links here.

Here's the download page: <http://www.taskadapter.com/download>

It's a commercial software with support, documentation and samples. New versions will be released approximately every 2 weeks.

- Status changed from New to Resolved

- % Done changed from 0 to 90

Redmine Java API becomes FREE and open-source (Apache 2 license) as of version 1.0.3.

http://taskadapter.com/redmine_java_api_1.0.3

Please, contact us if you want to help with the API improvements by spending your time or donating money to the existing volunteers.

1.0.3 version highlights:

- The distributive includes both plain-java and OSGI versions.
- Create/Update/Get operations are supported for Redmine Users (Redmine 1.1.0+ is required)
- Error messages provided by Redmine 1.1.0+ are now supported.
- Paging is supported for getUsers, getProjects operations.
- "Created on", "Updated on" fields are supported for Issues and Projects.
- Unneeded jars are removed from the dependencies. *

Hi, I am back here after a long time since I landed here for Redmine Java Client long time ago. It seems there are good progress on this. I am also using my small custom Java Connector for Redmine, which I have put at <http://code.google.com/p/redmine-jconnector/>

#10 - 2011-02-25 23:36 - Alex Last

Mohit, you're welcome to join the existing project: <https://code.google.com/p/redmine-java-api>
it already does everything you've planned for your connector.
