

Redmine - Defect #4842

INSTALL doc should explain where to get dependencies "nofxx-object_daddy" and "thoughtbot-shoulda"

2010-02-14 14:41 - Henning Sprang

Status:	Closed	Start date:	2010-02-14
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		
Description			
<p>as also can be seen in this place, there seem to be some dependencies in the latest versions (0.9.2) of redmine, that cannot be simply resolved by installing the gems from the default gem repository, but need an extra repository.</p> <p>these should either be included in the vendor libs, or better explained how to install them, because that's not so easy to find for less ruby-experienced admins</p> <p>see also here http://www.redmine.org/boards/2/topics/11130</p>			

History

#1 - 2010-02-14 15:53 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Invalid

These dependencies only apply for running tests.
You should find how to get these gems by reading RUNNING_TESTS.
