Description

bonjour from vienna,

i thought, it could be a great deal to tema work, if one could create a kind of protocol:

- who attended a meeting? (choose from members list)
- what tickets where diskussed?
- what tickets where created
- maybe: follow-up meeting

maybe it might be a kind of multi-item document? combining texts with lists...

on my way back to berlin and thinking where to go next,
christian
