

Redmine - Feature #4871

Allow defining a Gantt charts length by dates

2010-02-18 01:54 - Jeffrey Jones

Status:	New	Start date:	2010-02-18
Priority:	Normal	Due date:

Category:	Gantt	Estimated time:	0.00 hour
Target version:			
Resolution:			
Description			
<p>I am interested in using the Gantt chart's PNG output for embedding in a report document.</p> <p>For this to be useful I need to be able to set the PNGs length in terms of start-date to end-date. This would allow me to do things like:</p> <p>"Show me a Gantt chart starting from the beginning of the project and ending at the due date of Version X".</p> <p>The usefulness of this would increase as the REST APIs become more fully fledged and we can start getting more date information from RedMine.</p>
