

Redmine - Defect #4872

Pound (#) followed by number with leading zero (0) removes leading zero when rendered in wiki

2010-02-18 04:24 - Kioma Aldecoa

Status:	Closed	Start date:	2010-02-18
Priority:	Low	Due date:

Category:	Text formatting	Estimated time:	0.00 hour
Target version:	0.9.3	Affected version:	
Resolution:	Fixed		
Description A number like this: #0123456789 is rendered as: #123456789 literally: #0123456789 I would expect the leading zero preserved, like this: #0123456789 Even though a leading # is a way to automatically link, we have a usage where it is very convenient to be able to paste content with numbers with leading zeros that are prefixed by a # and that will never clash with issue numbers. I don't see a benefit to removing leading zeros, if they are present. As a workaround, we can prefix the # with !.
