

Redmine - Defect #4892

Problem with task redmine:email:receive_imap

2010-02-22 14:45 - Alex Rojo

Status:	Closed	Start date:	2010-02-22
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Email receiving	Estimated time:	0.00 hour
Target version:		Affected version:	0.9.2
Resolution:	Cant reproduce		

Description

I had the receiving mails by imap correctly working under 0.8 version but I have update to 0.9.2 and now, when there is a mail in the imap INBOX and I execute:

```
/usr/bin/rake -f /var/www/redmine/Rakefile redmine:email:receive_imap --trace RAILS_ENV="production" host=XXXXXX username=XXXXX password=XXXXXX
```

I get this error:

```
rake aborted!
Unknown namespace.

History

#1 - 2010-06-19 23:50 - Felix Schäfer

Can you confirm this is still a problem, preferably with the most current version?

#2 - 2010-06-20 08:42 - Alex Rojo

- Status changed from New to Resolved

seems to work now.

#3 - 2010-06-20 09:20 - Felix Schäfer

- *Status changed from Resolved to Closed*
- *Resolution set to Cant reproduce*

Great, thanks for the feedback :-)

#4 - 2011-06-28 02:13 - Matt Connolly

I'm getting this error message, but it appears to be happening for me when trying to copy the mail message into a move_on_success mailbox. There seems to be very little error checking in the imap code :(

#5 - 2011-06-28 03:24 - Matt Connolly

My error was caused by an imap folder being incorrectly specified. ie: the name of the folder wasn't correct.
