Target version:				
Resolution:	Invalid		**Affected version:**	

Description

I need add many user to Redmine using shell script and i'm trying insert using script/runner because User doesn't have API yet.

My fail test code is:

```
./script/runner "user = User.create(:id=> 29, :firstname => %[First], :lastname => %[Last], :mail => %[rduarte@thisisnotmyrealemail.com], :login => %[mylogin]); puts user.errors.full_messages" -e production

# Login can't be blank
```

I'm using:
- ruby 1.8.6 (2008-08-08 patchlevel 286) [i386-linux]
- Rails 2.3.5
- Redmine master from Github: last commit (f838904a7ead46c040e59c016275889f3d31ba56 Refactor: Extract Issue#bulk_edit from the IssuesController)

History

- Status changed from New to Closed

- Resolution set to Invalid

login is a protected attribute. You can't mass-assign it.
