| Description When filling out information for a project under the settings tab, the homepage part only works if the http:// is included at the beginning. It'd be nice if you could just have www.yourname.com and the link would still work. Though not a big issue, its something we've seen alot of users having issues with and misusing. | | | |

Associated revisions

Revision 3498 - 2010-02-28 10:10 - Jean-Philippe Lang

Fixed: Wrong link when "http" not included in project "Homepage" link (#4944).
