# Redmine - Defect #4958

# Lost password no longer flashes a confirmation message

2010-03-01 21:25 - Robert Chady

Status: Closed Start date: 2010-03-01

Priority: Normal Due date:

Category: Accounts / authentication Estimated time: 0.00 hour

Target version: 0.9.4

Resolution: Fixed Affected version:

## Description

Assignee:

When you entered a correct email in the lost password screen, it used to flash up a message 'An email with instructions to choose a new password has been sent to you.' letting the user know what was going on.

% Done:

0%

Now, if you do this, you get instantly redirected to the login page without a message, leaving the user confused on what was going on.
