

Redmine - Defect #4986

Creating tasks and selecting the type

2010-03-04 16:54 - José Moreira

Status:	Closed	Start date:	2010-03-04
Priority:	Normal	Due date:

Category:		Estimated time:	0.00 hour
Target version:		Affected version:	0.9.2
Resolution:	Invalid		

Description

I'm building a custom interface for some features regarding inetegrations with our own software and for that i needed to create a new column on the project trackers table:

```
ALTER TABLE `redmine`.`projects_trackers` ADD COLUMN `id` INT(11) DEFAULT NULL FIRST;
```

Since ActiveRecord does not support an auto key here, i have a working trigger to increment the ID.

It was working well except that when adding a new task, the combobox with the tracker types uses that column (id) for the tracker id instead of the ID from the "trackers" table and it's breaking my solution.

Any ideas?

Best

History

#1 - 2010-03-04 19:35 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Invalid

I hope you'll understand that this is not a Redmine defect.
