Description

When I post somethinge in redmine via SSL, it's will try to redirect to a "http" url.
EP. I visit URL "httpS:\\redmine.org", and post a issues or modify a wiki page, it's will try to redirect to "http://redmine.org/...." but the right url is "httpS://redmine.org/...".

please check the actions to cause this bug below:

- POST something
- change config in admine page.
- jump between projects via select project name in list.(it's only working in Homepage)

sorry, it's not a redmine bug.

when I add this line below in my ngnix.conf, redmine working perfect:

```
proxy_set_header X_FORWARDED_PROTO https;
```
