Target version:			
Resolution:	Fixed		
Description Enumerations can be added but not deleted, would be nice to be able to, with the possibility to assign all issues with deleted enumeration to another existing one. For example, issues have been assign the Design activity for time tracking and you decide to add more detailed ones like interface design and schema design. When deleting the design activity, we should be able to reassign all issues tagged design to interface design for example			
Related issues: Is duplicate of Redmine - Feature #1467: Can't delete some Activities in Enum... <div>Closed2008-06-16</div>			

History
