

Redmine - Patch #5027

hook in the mail_handler

2010-03-10 08:11 - Jie Ma

Status:	New	Start date:	2010-03-10
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Email receiving	Estimated time:	0.00 hour
Target version:			
Description Add a hook in the models/mail_handler.rb, and change the get_keyword() to public, which I can call it in plugin. I can get more (like start_date) or some custom keywords through this patch. Not sure is it safe if I change the get_keyword() to public. Thanks.
