superscript + subscript	OK		subscript + superscript	**ERROR**

- Use of formatting of the text without blanks does not work.

In the description of format **Textile** brackets [ ] are for this purpose provided.

example:
te[_st italic te_]xt - "st italic te" should be italic.

May be need integrate RedCloth latest version - 4.2.2?

#3 - 2010-03-11 10:35 - Mike Stupalov

I have tried the code used above on official page RedCloth http://redcloth.org/try-redcloth/ - all combinations there work.

Modifiers combinations are fixed in r3561.

> In the description of format Textile brackets [ ] are for this purpose provided.

This was not a Redcloth 3 feature and thus, it's not supported by the builtin textile formatter in Redmine.

> May be need integrate RedCloth latest version - 4.2.2?

Well, it would be pretty easy to write a plugin that adds a new formatter with the latest RedCloth instead of the Redmine builtin formatter, but you'd lose a few additions like tables of content, quoting or code highlighting.

Many thanks for the corrections.

But there was another problem with the combination format and the brackets:

(100 - Ksp)/100	/**100**
* (100 - Ksp) /100*	* (100 - Ksp) /100*

And the second question, how much is difficult to add to the current format textile brackets to indicate the format without spaces?
