Category:	Database		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Wont fix		**Affected version:**	

Description

When I run the command "rake db:reset" it is not readding the default admin account.

History

#1 - 2010-03-13 18:28 - Jean-Philippe Lang

- Category set to Database

#2 - 2018-01-13 09:05 - Go MAEDA

Please use db:migrate:reset instead. It creates "admin" account and built-in groups (Anonymous, Non-member).

Those objects are created during the migration process. db:reset recreates tables from db/schema.rb but doesn't run any migrations. On the other hand, db:migrate:reset runs all migrations after dropping the database.

#3 - 2018-01-14 03:36 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Wont fix

It is the expected behavior. Closing this issue.
