Target version:			
Resolution:	Invalid	**Affected version:**	

Description

Im running Redmine 0.9.3.stable.3521 (MySQL) in ubuntu

1. I created a list custom field for a TimeEntryActivity enumeration , and set the default value in 1
2. I lod some time and picked one value of the enumeration
3. The custom value is not in the custom values table associated with the custom field
