**Description**

The attached patch will show issues and their sub-issues in a hierarchic layout. The patch is more proof-of-concept than actual production code (the change to issues_controller is not the way you'd want to handle this), but I don't know where else to change it. The patch is small but adds what I think is an essential feature to the freshly-minted subtasks functionality (issue 443).

## History

**#1 - 2010-03-19 09:04 - Fri Flaj**

*- File hier-list.patch added*

updated patch to also show hierarchy in the roadmap

**#2 - 2010-03-19 09:45 - Fri Flaj**

*- File hier-list.patch added*

...and in the version display

**#3 - 2010-03-30 16:51 - Fri Flaj**

Looks like a duplicate for [#5196](#5196)

**#4 - 2010-03-30 19:00 - Felix Schäfer**

Does [#5196](#5196) solve your issue? I'd then close this one here and make it a duplicate of [#5196](#5196).

**#5 - 2010-03-30 23:54 - Fri Flaj**

[#5196](#5196) solves most of my issue. My preference would have been that sub-tasks always stay with their parent, which [#5196](#5196) only does when you sort on ID, but if that behaviour is settled on in Redmine-core, my patch has no additional value.

Since [#5196](#5196) is already in, I would propose marking this a duplicate and closing it, I'll continue the discussion on [#5196](#5196) itself.

**#6 - 2010-03-31 16:40 - Felix Schäfer**

*- Status changed from New to Closed*

Done.
