<b>Description</b>			
Running on either safari or chrome on Snow Leopard, the context menu appears to be functioning but selections made there have no effect on issues.			
redmine 0.9.14 Safari 4.0.5 (6531.22.7) Chrome 5.0.307.11			
Here I set a bug priority to "Moderate Can work around". Though I've sterilized the info here the authenticity_tokens all matched.

History

I don't know what Redmine **0.9.14** is exactly but the context menu was broken by [r3478](#) and fixed in [r3521](#).  
So if you're using trunk, upgrade as appropriate and it should work fine.

Thanks, the redmine version was 3487, I don't know why I thought it was 0.9.14 anymore. 3600 fixed this problem but now I am getting a 500 when changing issues. The log says `ActionView::TemplateError (undefined local variable or method `issue' for #<ActionView::Base:0x107304208>)` on line [#14](#) of `app/views/issues/_history.rhtml` . I'll ask around before opening an issue on that.

- *Resolution set to Invalid*

OK, thanks for the feedback. See my reply on [#5113](#) for the last problem.
