

Redmine - Feature #5131

Query.has_column() should support has_column(:column_name)

2010-03-19 18:42 - Randy Syring

Status:	Closed	Start date:	2010-03-19
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Code cleanup/refactoring	Estimated time:	0.00 hour
Target version:			
Resolution:	Fixed		
Description			
<p>(01:36:10 PM) edavis10: rsyring: @query.has_column() expects a QueryColumn object</p> <p>(01:36:54 PM) edavis10: rsyring: though we should change it to support @query.has_column(:name) and @query.has_column?(QueryColumn....)</p>

Hi there,

any news on this ticket?

#3 - 2013-01-12 23:07 - Etienne Massip

- Status changed from New to Closed
- Resolution set to Fixed

This has been done some time ago with [r8073](#), see <source:/trunk/app/models/query.rb@11174#L390>.

It just takes a String instead of a Symbol.
