Description

```
netstat -lnp
```

Proto Recv-Q Send-Q Local Address   Foreign Address   State   PID/Program name
tcp6   0   0 192.168.178.27:56975   :::*   LISTEN   17180/java

Instead of binding to 192.168.178.27, the socket of JUnique should bind to 127.0.0.1. This should be easy to fix.
