

Redmine - Defect #5151

There is an error in the age calculation for git repositories

2010-03-22 20:26 - Jens Fahrenbrück

Status:	Closed	Start date:	2010-03-22
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	0.9.3
Resolution:	Duplicate		
Description			
<p>The time ago of a git commit is decreasing within the first hour or so. It starts with "about 1 hour ago" and then decreases.</p> <p>The screenshots were taken 5 minutes apart, the discrepancy is marked in the second screenshot. There you can see that the last commit (marked red) has an age of "about 1 hour ago" and the commit 19 minutes before that (marked green) is 32 minutes old, 5 minutes earlier it was 37 minutes old (see first screenshot)</p>			

History

#1 - 2010-04-07 00:52 - Jens Fahrenbrück

now with the summer time the difference is two hours but on my local machine I get:

```
$ date
Mi  7 Apr 2010 00:51:19 CEST
```

on server I get:

```
$ date
Wed Apr  7 00:51:27 CEST 2010
```

except for the language and the seconds it is the same time. but on redmine says the commit is 2 hours from now

#2 - 2010-04-07 10:13 - Jens Fahrenbrück

I have now found the Problem:

the date string delivered by git looks like this: "Wed Apr 7 00:50:16 2010 +0200"

in app/views/repositories/_dir_list_content.rhtml:21

```
distance_of_time_in_words(entry.lastrev.time, Time.now)
```

entry.lastrev.time = "Wed Apr 7 00:50:16 2010 +0200"

This code class String#to_time on "Wed Apr 07 00:50:16 UTC 2010", but it returns "Wed Apr 07 00:50:16 UTC 2010"

#3 - 2010-11-11 16:05 - Toshi MARUYAMA

- Status changed from New to Resolved
- % Done changed from 0 to 100

This issue is duplicated with [#6346](#) and fixed by [r4187](#).

#4 - 2010-11-13 10:18 - Felix Schäfer

- Status changed from Resolved to Closed
- Resolution set to Duplicate

This should be fixed, please open a new issue if this problem still persists.

Thanks for spotting the duplicates, Toshi.
