

Redmine - Defect #5207

Admin issue status change

2010-03-29 16:51 - Brandon Bonds

Status:	Closed	Start date:	2010-03-29
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues permissions	Estimated time:	0.00 hour
Target version:		Affected version:	0.9.3
Resolution:	Duplicate		
Description As an administrator, I cannot change the status of an issue in a project that I am not a member of. I can change everything about the issue other than the status (even though I haven't tried, it looks like I can even delete an issue). Since I am an admin, I can always give myself temporary permission to change the status, but I would rather not have to do that. The code that keeps this from happening appears to be in models/workflow.rb: <pre># Find potential statuses the user could be allowed to switch issues to def self.available_statuses(project, user=User.current) Workflow.find(:all, :include => :new_status, :conditions => { :role_id => user.roles_for_project(project).collect(&:id) }). collect(&:new_status). compact. uniq. sort end</pre> It affects both regular status change and bulk status change. In the case of bulk, I do not get any options, only "(No change)". Thanks! - Brandon
