Description

Hi,
Is there any plugins available to to have facility to write test cases and test case execution?

Please help me in this regards.

Thank You,
Khush

I'm not aware of any plugins, but you can integrate our test management tool TestRail (http://www.gurock.com/testrail/) with Redmine. Hope this helps.

I think this is not the best place to ask question, and I understand that you want to make a feature request.

In this forum topic there's a discussion about a plugin for Tests Case Develpoment/Execution.
