Redmine - Feature #5232

Show 'My page' after login

2010-04-01 16:57 - Robert Schneider

Description

It would be also nice if there would be a user setting that allowes one to get to the *My page* after login, instead of the *Home* page.

Generally, a better *My page* would be nice. With more configuration options. I would be happy if I could see all tickets (observed, assigend to, ...), not only the first 10.

I created a patch for this issue. It doesn't make the "My Page" any prettier, but in "My Account" it allows you to choose whether you would like your homepage to be My Page, or the default index page. Feel free to try it out!

Thanks, this is very useful.
How this setting get stored in the database?
I don't see any "default_homepage" in the users table.
I'm sorry if I'm asking for a dumb question, I'm not a ruby developer.

In redmine 2.5.x   .. config/route.rb

```
# root :to => 'welcome#index', :as => 'home'
root :to => '', :controller => 'my', :action => 'page', :as => 'home'
```

```
root :to => '', :controller => 'my', :action => 'page', :as => 'home'
```

doesn't seems to work on redmine 3.1.0 (internal error) then I modify only with the begin of your patch,
in "app/controllers/account_controller.rb" :

```
= call_hook(:controller_account_success_authentication_after, {:user => user })
- redirect_back_or_default my_page_path
+ redirect_to :controller => 'my', :action => 'page'
```

This work for me:

```
root :to => 'my#page', :via => :get, :as => 'home'
```

#8 - 2019-12-18 14:51 - Muzaffer Dağlıoğlu

my redmine version 4.0.5

file path
"..\redime\htdocs\app\controllers\account_controller.rb"

code is working...

```
    call_hook(:controller_account_success_authentication_after, {:user => user })
    redirect_to :controller => 'my', :action => 'page'
```
