<b>Description</b> Hi everyone! I need some help with a new custom field. This custom field is a list, but not a fixed list. It should let you add news items just like the field 'Target Version'.  I also need to add a new custom field when I create a new project. Is that possible?  Kind regards, P.C.

- Tracker changed from Patch to Feature
- Category set to Custom fields

#2 - 2012-09-14 10:02 - no no

I have the same trouble: a custom fiels i want to add has a type "list". But its content will grow as users work.  
It`s not comfortable for them to call me every ticket when it needs a new value of that field. And even more unconvinient for me: i should left all my current work to add a short string to that list.  
If this problem can be resolved another way, please, note that.
