

Redmine - Defect #5263

LDAP: Administrator flag is reset on login

2010-04-07 17:59 - Andreas Wolf

Status:	Closed	Start date:	2010-04-07
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	LDAP	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Cant reproduce		
Description When I mark an account from LDAP as administrator and the user logs in again, the administrator flag is reset - so it's not possible to have administrators login with their LDAP data. I would expect this flag be to not touched altogether, as it is nothing that comes from LDAP either. Even better would be to specify a group whose members automatically gain administrator privileges, as is possible with roles in projects.
