

## Redmine - Feature #5274

### Add hook allowing AuthSources to supply a CAPTCHA challenge

2010-04-08 17:40 - Evan Kaufman

<b>Description</b> It would be extremely useful to me if an AuthSource subclass could supply a CAPTCHA challenge image to the end user (presumably from the authenticating back-end), and subsequently get a CAPTCHA answer back.  I've been working on a <a href="#">ClientLogin auth source</a> which has the drawback that sometimes Google decides to issue a CAPTCHA challenge. When this happens, there is currently no way for me to pass this on to the user, so authentication simply fails until the challenge expires.
